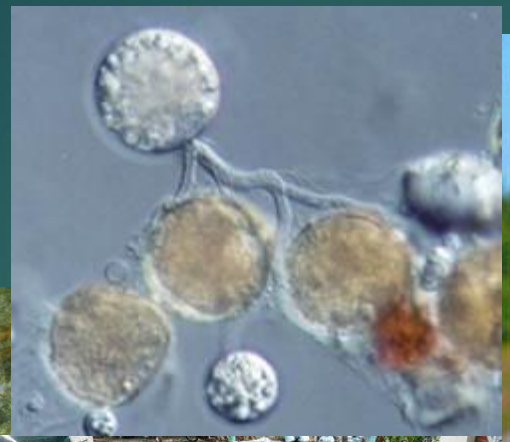
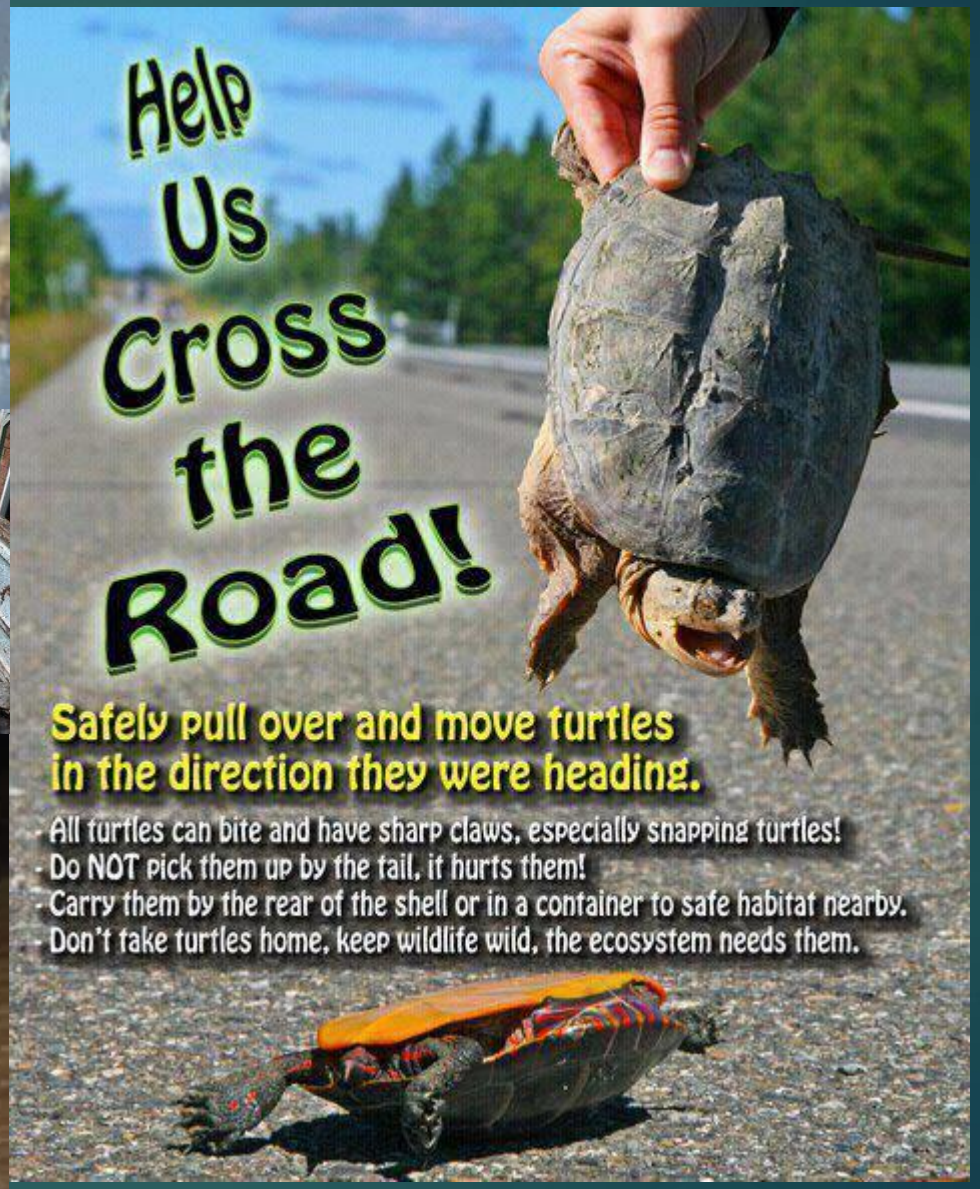
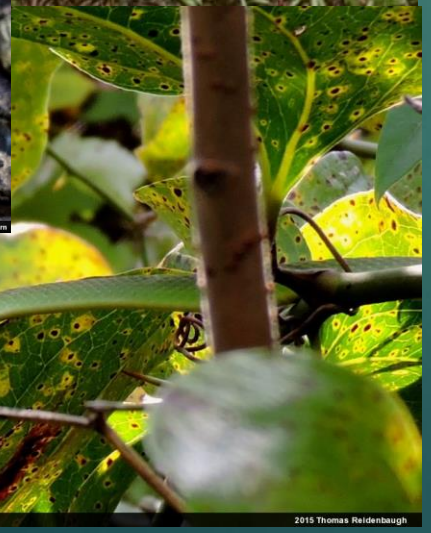
Threats





Help Us Cross the Road!
Safely pull over and move turtles in the direction they were heading.
- All turtles can bite and have sharp claws, especially snapping turtles!
- Do NOT pick them up by the tail, it hurts them!
- Carry them by the rear of the shell or in a container to safe habitat nearby.
- Don't take turtles home, keep wildlife wild, the ecosystem needs them.

Historic and New



Rare

Decontamination

- Rinse (Clean off all solids and mud)
- Bleach (Apply 10% bleach solution)
- Wait (5-10 minutes)
- Rinse (Clean water rinse)
